Guideline for Community Engagement and Municipal PPP Projects

The draft **Guideline for Community Engagement and Municipal PPP Projects** is open for public consultation to capture inputs and recommendations by all relevant stakeholders.

The guideline has been prepared by PO-RALG PPP Node, which coordinates the public-private partnership (PPP) program of local government authorities. It provides a practical, systematic way to engage communities in PPPs. A two-way process is presented; it is just as important to listen to and consider community input into a PPP as it is to share information and inform communities about the project. The aim is to improve the development outcomes from PPPs by mobilizing the community's input.

We appreciate your input and feedback on the guideline by September 30, 2019.

While all comments received will be reviewed and documented, comments and recommendations may not necessarily be incorporated into the final version of the guideline. A comprehensive table will be released at the end of the consultation phase listing all feedback, comments and recommendations without attribution to the person, organization or entity that submitted it.

World Bank is assisting PO-RALG through the Tanzania PPP Support Program funded by the United Kingdom's Department of International Development. The program has been in operation since 2017 and is assisting the preparation of local government authority, national and Zanzibar PPPs. Around 50 PPPs are currently being assisted by the program.

Thank you in advance for your feedback.
